Deck: Solar System - English

Topic: Solar System | Language: English

Cards: 3

Card 1:

Front: What is the Solar System?

Back: The Solar System is a gravitationally bound system comprising the Sun and the objects that orbit it, including eight planets, their moons, dwarf planets, asteroids, comets, and meteoroids. The Sun contains more than 99% of the total mass of the Solar System and provides the necessary heat and light to sustain life on Earth.

Card 2:

Front: Name the eight planets in the Solar System.

Back: The eight planets in the Solar System, in order from the Sun, are: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune. Each planet has distinct characteristics, such as size, composition, and atmosphere.

Card 3:

Front: What is the Kuiper Belt?

Back: The Kuiper Belt is a region of the Solar System beyond the orbit of Neptune, extending from about 30 to 55 astronomical units (AU) from the Sun. It is populated with small icy bodies, including dwarf planets like Pluto, Haumea, and Makemake. The Kuiper Belt is significant for studying the early Solar System and the formation of planetary bodies.
